

Basic Calculator C Code

Console-based arithmetic calculator implementation in C

Language:	C (C99 standard compatible)
Features:	Menu selection, Arithmetic operations, Division-by-zero check

CALCULATOR.C

```
#include <stdio.h>

int main()
{
    float num1, num2, result;
    int choice;

    printf("==== BASIC CALCULATOR ====
");
    printf("1. Addition
");
    printf("2. Subtraction
");
    printf("3. Multiplication
");
    printf("4. Division
");

    printf("
Enter your choice (1-4): ");
    scanf("%d", &choice);

    printf("Enter first number: ");
    scanf("%f", &num1);

    printf("Enter second number: ");
    scanf("%f", &num2);

    switch(choice)
    {
        case 1:
            result = num1 + num2;
            printf("Result = %.2f", result);
            break;
```

```
    case 2:
        result = num1 - num2;
        printf("Result = %.2f", result);
        break;

    case 3:
        result = num1 * num2;
        printf("Result = %.2f", result);
        break;

    case 4:
        if(num2 != 0)
        {
            result = num1 / num2;
            printf("Result = %.2f", result);
        }
        else
        {
            printf("Error! Division by zero is not allowed.");
        }
        break;

    default:
        printf("Invalid Choice!");
}

return 0;
}
```
